

KinderSign – Add a Classroom to the Tablet

Replace the tablet's current classroom roster with a different classroom from the same Center location. You scan the new classroom's QR code to load its roster and check additional children in and out of care.

A Sign in to KinderSign using the identification method selected by your agency.

B Locate the **Mobile Sign In Sheet** corresponding to the **Classroom** you would like to add.

C Tap **Scan QR Code**.

D Move the QR code into the view of the tablet camera so the entire code is visible on the tablet screen. As soon as the whole code is visible, the tablet scans it automatically.

E The **Classroom** is added, and the list of children for that location displays for future check-ins and check-outs.

Note: Once the tablet accepts the new Classroom, previously scanned Classrooms will not display.
