

KinderSign – Work in Offline Mode

If the tablet loses its Wi-Fi connection, you can keep collecting attendance while the device is offline. Attendance recorded during the outage is saved and transmits automatically once the tablet is back online.

- A** Check the tablet's current status in the top left corner of the screen — it always displays **Online** or **Offline**.

- B** If entering attendance, complete it as usual and tap **Submit**. The attendance transmits automatically to CenterTrack when the connection is restored.

- C** Your System Administrator uses the CenterTrack **Administration > Settings > Mobile Attendance** page to set the number of seconds between retry attempts for uploading offline transactions — usually every 60 seconds — and to determine whether attendance can be backdated while the device is offline.
